

# Task Force Assignment

AALBORG UNIVERSITET

**Task Force Name: Designing the physical space for the forthcoming AAU business school**

**TF-EDU 04**

**Task Force Members: TBD**

**Task Force website: <https://www.intranet.business.aau.dk/business-school-taskforces>**

## 50 WORD DESCRIPTION OF THE ACTION POINT

The purpose of this action point is to ensure that the surrounding physical study environment and the seminar rooms in Fibigerstræde 2 and 11 are inspiring, motivational and updated in relation to the PBL anchored learning philosophy at the forthcoming AAU business school. This will be realized in close collaboration with Campus Service (CAS) and will address issues presented in the study environment evaluation.

## EXPECTED OUTPUT

The expected output is a report that contains:

- A line of concrete suggestions that can be realized and implemented in 2020 and 2021.
- The suggestions are directly linked to issues presented in the study environment evaluation.
- The suggestions should be aligned and support the strategy for the forthcoming AAU business school.
- An agreement with CAS that indicate what they will ensure.
- A budget for the initiatives that the department will finance.
- Possibly written agreement(s) with organisations that wish to support the design of the physical space for the forthcoming AAU business school.

It is important that your report is specific about how the suggestions are implemented in practice through processes at the department level.

## EXPECTED OUTCOME(S)

A central part of the forthcoming AAU business school is that the physical environment at Fibigerstræde 2 and 11 are inspiring, motivating and aligned with the strategy, so students experience that they are students enrolled at a business school with ambitions to bridge theory and practice in PBL anchored ways.

The initiatives identified and realized based on the work of this task force will support the realization the above mentioned outcomes.

## BACKGROUND OF THE ACTION POINT AND ITS CONTEXT

This action point is a proactive initiative to provide our students with the best possible physical study environment. The students have several times indicated that they would appreciate it if the study environment at Fibigerstræde 2 and 11 was more inspiring and motivational. Furthermore, the action point has important relations to the realization of the forthcoming AAU business school.
